

Table Top Cup Sealer

Simple controls

DESCRIPTION

This table top unit will automatically apply a plastic membrane to cups in diameters up to 4.5" and depths up to 5". This unit utilizes roll fed plastic or poly films. Once the filled cup is placed in the cup holder, the machine will automatically move it in under the sealing head. The sealing head lowers applying and trimming the seal on the top of the cup. The cup moves back out for operator removal. With each cycle, the film will automatically advance. Speeds – 10 to 20 cups per minute.
